EDUCATION

Universitas Padjadjaran

Bachelor Degree of Computer Science Department

West Java, Indonesia

Aug 2017 - Aug 2023

WORK EXPERIENCE

PLABS.ID

Software Engineer

West Java, Indonesia

Mar 2021 - Dec 2021

- Using Laravel, NodeJS and ReactJS in the development process.
- Successfully developed and launched the Kapalasar e-commerce website using Laravel, handling end-to-end development including system design, feature implementation, database management, and performance optimization to ensure a seamless and user-friendly online shopping experience.

Diceritain

Software Engineer

West Java, Indonesia

Oct 2022 - Dec 2022

- Using ReactJS and NextJS in the development process.
- Successfully led the rebranding and redevelopment of the company website using React and Next.js, enhancing the overall user experience, improving website performance, optimizing SEO, and aligning the digital presence with the company's updated brand identity and business objectives.

PT Xsis Mitra Utama

Software Engineer

Jakarta, Indonesia

Oct 2023 - Apr 2025

- Contributed to the development and enhancement of web applications at PT Xsis Mitra Utama, collaborating with cross-functional teams to deliver high-quality digital solutions.
- Utilized ReactJS and ASP.NET in the development process to build responsive and scalable web applications.
- Successfully developed a pharmacy website as part of a team of four developers, ensuring timely delivery and alignment with business requirements.
- Developed and delivered a targeted banking project for Bank Mega using Java and Spring Boot, achieving all project objectives within a six-month timeline
- Collaborated with cross-functional teams to design, implement, and optimize backend services, ensuring high performance, reliability, and scalability of the banking platform.

PT. Wixander Beneficia Technology

Business Analyst

Jakarta, Indonesia

Aug 2025 - now

- **Teck Leong Metals ERP (Enhancement Phase)**
- **ST MES (Manufacturing Execution System)**

Responsibilities & Achievements:

- Manage and coordinate end-to-end Odoo ERP implementation, covering requirements gathering, system design, development, testing, and deployment.
- Lead cross-functional teams in delivering Odoo customizations across Sales, Purchase, Inventory, POS, Manufacturing, and Accounting modules.

- Design and implement tailored business workflows, data models, and automation to align system functionality with operational needs.
- Develop and maintain custom Odoo modules using Python, including XML-based UI customization and scheduled server actions.
Oversee Git version control and manage environment configurations for staging and production deployments.
- Conduct sprint planning, progress tracking, stakeholder alignment sessions, and ensure timely delivery of project milestones
- Prepare and deliver client demonstrations and presentations; **ST MES is currently entering the client validation phase**, while **Teck Leong Metals ERP is in the ongoing enhancement and optimization phase** to further improve system performance and business processes.

PROJECTS

- **WEB DATABASE FACULTY FMIPA:** Developed a data monitoring website for BEM KEMA FMIPA UNPAD using Laravel, designing and implementing system features to support data tracking, reporting, and streamlined organizational decision-making.
- **UP Learning Centre:** Designed and built a **PostgreSQL** database schema from scratch to support multi-role access (Admin, Teacher, and Student), developed and maintained **RESTful APIs** using **NestJS** covering authentication, student registration, admin management, and teacher scheduling features, implemented backend logic for dynamic scheduling, student grouping, and program configuration, deployed and managed backend services on a **VPS** with **Git**-based version control, conducted endpoint testing using Postman to ensure performance and data integrity, and collaborated within a three-person agile team (**Backend, PM/Frontend, Frontend**) to ensure seamless **API** integration and timely feature delivery.

LEADERSHIP

INSTAGRAM (Informatics Sports Arts and Games) - Project Officer

- Led the planning and execution of a large-scale faculty event encompassing 6 sports (Basketball, Football, Chess, Table Tennis, Badminton, Volleyball, and Futsal), 4 arts competitions (Vocal Solo, Photography, Dance, Musicalization, and Band), and 4 e-sports tournaments (Mobile Legends, Dota 2, PUBG Mobile, and CS:GO), coordinating cross-functional committees, managing event operations, and ensuring successful delivery of all competition categories.

MIPA Awards - Vice Project Officer

- Assisted in organizing year-end activities at the Faculty of Mathematics and Natural Sciences to recognize and celebrate student achievements from the past year, coordinating event logistics and programs, and managing guest star appearances to successfully close the event.
